Subject: Approval for Software Access through I-STEM Portal for Skill Development of PhD Scholar

Dear Sir/Madam,

This is to certify that Ms. Shikha Thapa, a PhD research scholar under my supervision in the CSIR-Central electrochemical research institute (Chennai Unit), is actively engaged in advanced research related to fuel cells for her doctoral work.

In order to strengthen her technical capabilities and promote interdisciplinary learning, she intends to access and utilize MATLAB software through the I-STEM platform for skill development and training purposes. The hands-on exposure to this software will enhance her research proficiency and align with the objectives of her PhD thesis.

I fully support and approve her request to access the above-mentioned software via the I-STEM portal for academic skill development. The software will be used strictly for educational and research-related learning activities under my guidance.

Kindly consider her application for software access under the I-STEM Skill Development initiative.

Thanking you.

Yours sincerely,

Dr. A.K. Sahu

PhD Supervisor

Senior Principal Scientist

CSIR-Central Electrochemical Research Institute (Madras Unit)
