GUIDE APPROVAL LETTER

To Whom It May Concern,

This is to certify that Ms Vishakha Chauhan is currently pursuing her PhD degree under my supervision in the Interdisciplinary Centre for Water Research at the Indian Institute of Science (IISc), Bengaluru.

I hereby approve and recommend her request to access and download COMSOL Multiphysics® software through the I-STEM platform for academic and research purposes. The software is required for simulations and modelling related to her doctoral research work and will be used exclusively for educational and research activities associated with her PhD thesis.

I confirm that access to COMSOL Multiphysics will significantly support her research objectives and contribute to the successful completion of her doctoral studies.

I therefore request the concerned authorities to kindly consider and approve her request for access to the software.

Thank you for your support.

Best regards,

Praveen.C.R
